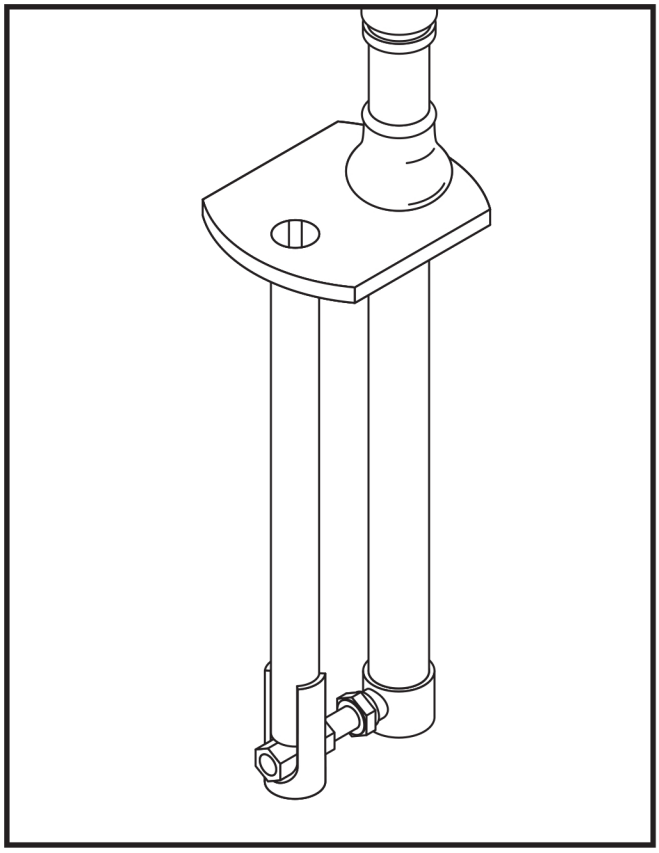
Hydrant Option

OPTION - R01

INTEGRAL SHUTOFF VALVE



❑ **Option** - R01

STANDARD FEATURES

Option - R01 allows a hydrant to be serviced without turning off the water supply to the entire system. A shutoff valve is located at the depth of bury, adjacent to the operating valve of the hydrant. This option includes a base plate with a slotted shutoff knob. Option - R01 is available factory installed on 3/4" and 1" post hydrants. Option - R01 may also be ordered separately for installation in 3/4" and 1" water lines.

Exposed parts are finished with a heavy grade of oil-based green enamel. Solid brass castings conform to ASTM standards B61 and B62. Lead-free castings are used in all waterways.
